

OLAYELE GBENGA AWUJOOLA

AI Automation Engineer | Workflow Orchestration | LLM & RAG Integration

+234 706 420 3742 • smarworld25@gmail.com • [linkedin.com/in/olayele-awujoola](https://www.linkedin.com/in/olayele-awujoola) • github.com/Ireolami • Lagos, Nigeria • Remote

PROFESSIONAL SUMMARY

AI Automation Engineer with 4+ years designing, building, and deploying production AI-powered automation across operations, HR, and sales functions. Shipped 2–3 automation systems monthly using n8n, Make, and Zapier; engineered a RAG chatbot on n8n with OpenAI embeddings and a Supabase vector store; integrated GPT-4o into CRM and internal-tool workflows; and built Python/SQL pipelines processing 10,000+ records daily, cutting prep time 60%. Strong in API integration, system design, and performance monitoring in fast-paced, rapid-prototyping environments.

CORE SKILLS

Languages & Scripting: Python (Pandas, NumPy), JavaScript, SQL (PostgreSQL, MySQL, BigQuery)
Automation & Orchestration: n8n (advanced, production), Make, Zapier, Workato, Google Apps Script; event-driven & workflow orchestration
AI / ML & LLMs: GPT-4o (structured outputs, function calling), OpenAI & Claude integration, RAG pipelines, vector stores (Supabase), embeddings, AI agent architectures, prompt versioning
APIs & Integration: REST APIs, webhooks, OAuth; CRM/ERP integration (HubSpot, Salesforce, Intercom, Zendesk); WhatsApp Business API
Cloud & DevOps: AWS, Cloudflare, Docker, Kubernetes, Supabase; CI/CD-ready deployment, containerized services
Backend & Data: Node.js, TypeScript; PostgreSQL, MySQL, BigQuery, MongoDB; Kafka & event-driven streaming; ETL design, deduplication, schema normalization, data-quality validation
Monitoring & Reporting: system instrumentation, A/B testing, KPI dashboards (Power BI, Airtable, Looker Studio-compatible)

PROFESSIONAL EXPERIENCE

AI Automation Engineer / Data Analyst

Mar 2024 – Present

E-Know Consult — Ibadan, Nigeria

- Designed, developed, and deployed 2–3 production AI-powered automation solutions per month using n8n, Zapier, and REST APIs — building enrichment pipelines, conditional scoring logic, lead routing, and CRM/internal-tool integrations that eliminated 15+ hours of manual processing weekly across Finance, Operations, and HR.
- Integrated GPT-4o into existing systems via structured outputs and function calling inside n8n workflows, adding LLM-powered personalization and AI-assisted review layers that replaced repetitive manual copy and validation cycles.
- Engineered Python and SQL ETL pipelines processing 10,000+ records daily with data-quality validation gates, deduplication, and schema normalization — reducing data preparation time by 60% and downstream errors by 35%.
- Identified opportunities to automate repetitive workflows across business functions, rapidly prototyping and iterating on solutions to validate business impact before full rollout.
- Monitored automation system performance, troubleshooted failures, and ran structured A/B experiments on routing rules and output quality — defining success metrics upfront, instrumenting each variant, and reporting runs, success rate, and cost saved to leadership.
- Configured email/domain infrastructure (DNS, DMARC, DKIM, SPF) and deliverability-conscious sending architecture for outbound campaign environments.
- Documented workflows, automation logic, and runbooks in plain language, driving adoption and independent operation across non-technical, cross-functional teams.

Data Science & Automation Instructor

Feb 2023 – Feb 2024

SQI College of ICT — Ibadan, Nigeria

- Designed and delivered an automation curriculum to 50+ learners covering Python, SQL, ETL design, Zapier, and Google Apps Script — achieving a 90%+ project completion rate with all systems documented and self-serviceable.
- Supervised end-to-end automation projects from scoping through shipped deliverables, with success metrics defined before build-out.

Research & Data Officer (Part-time)

Nov 2020 – Dec 2022

PIDI-Nigeria — Bauchi, Nigeria

- Identified manual data bottlenecks across concurrent national programs and implemented automation that reduced manual processing time by 30% and cut data-entry error rates significantly.
- Maintained data accuracy and consistency standards for government policy reporting, enforcing quality thresholds before field data reached submission pipelines.

KEY PROJECTS

RAG Chatbot — Company Knowledge Assistant *n8n · OpenAI (GPT-4o + embeddings) · Supabase Vector Store · AI Agent · Google Drive*

- Built and published a Retrieval-Augmented Generation chatbot that answers natural-language questions over company documents — Google Drive document loading, OpenAI embeddings into a Supabase vector store, an n8n AI Agent with chat memory, and retrieval-grounded responses returning accurate, source-based answers in ~6 seconds.

AI-Powered Applicant Tracking System *n8n · GPT-4o · Google Drive · REST API · Gmail · Google Sheets*

- Shipped a 14-node enrichment and routing pipeline: ingestion, structured extraction, GPT-4o scoring via function calling, and conditional pass/fail routing to Gmail and Sheets — eliminating 8+ hours of manual weekly review, with a versioned prompt library and eval checklist keeping scoring auditable.

Social Media Intelligence Monitor *n8n · SerperDev · X API · Airtable · Slack · Telegram*

- Architected a real-time multi-source signal pipeline with filtering, deduplication, and structured alert routing — replacing 6+ hours of manual monitoring weekly, instrumented with run counts, alert volume, and delivery success rate.

Crypto Market Monitoring Automation *Make · CoinGecko API · Airtable · Gmail · Telegram*

- Deployed an event-driven enrichment and alert pipeline — live API ingestion, conditional threshold scoring, multi-channel alert routing, and a real-time analytics dashboard logging all trigger events.

Smart Water Distribution Analytics System *MQTT · ThingsBoard · Python · Time Series · IoT*

- Built a production IoT event-driven pipeline for Lagos State Water Corporation — MQTT telemetry ingestion, Python time-series anomaly detection, and real-time alert routing to operational dashboards with live KPIs.

EDUCATION & CERTIFICATIONS

B.Sc., Computer Science — Federal University, Oye-Ekiti (GPA 4.2/5.0) 2026

HND, Biochemistry — Rufus Giwa Polytechnic, Owo (GPA 3.3/4.0) 2018

- Diploma in Data Science — SQI College of ICT, Ibadan (2023–2024)
- Data Analytics with Power BI — 720 Degree Business School, Ogun (2023)
- Database Management Systems — Aminu Jalam Statistical Software Technology, Bauchi (2022)
